Tech@State Campus Ambassador Program

VIRTUAL STUDENT FOREIGN SERVICE

VSFS

Project Title	Tech@State Campus Ambassador Program
Project Summary	We're seeking creative and highly motivated individuals for our Tech@State Campus Ambassador internship program. If selected, you'll work with our team to create a customized project plan unique to your career interests and academic goals/requirements.
Country	United States
Agency	Department of State
DoS Office	IRM/CIO
Post	N/A
Section	N/A
Number of Interns	10

Project Description

While the job responsibilities and project details for each Tech@State intern varies (as we provide and support a customized Tech@State internship experience for each student we select), all of our Campus Ambassadors will gain hands on experience being part of a team that works on a wide range of exciting and challenging technology-related projects & initiatives here at State. By engaging as 'teammates' alongside our Foreign Service IT Specialists who serve in embassies and related missions around the world, our interns gain a unique perspective into the work we do to innovate and support technologies, systems, and processes that power American diplomacy & protect our nation's information assets. Our interns don't do busy work, or engage in mindless computer tasks that are second-nature to a digital-native; rather, we view our interns as key team members who come to the table as experts in the very thing we value most--new ideas.

Desired Skills Interests
